

1ST ANNUAL WITNe RESEARCH DAY

The Wisconsin Institute for Translational Neuroengineering (WITNe) invites you to join in our first annual research day.

In an effort to continue our mission to provide a collaborative space for innovative research across departments, across campus, as far as our efforts take us, we are hosting a **FREE** poster and talk session.

Friday, April 17th

9am – 3pm

(see agenda for details)

Our goal is to increase collisions of intellect across UW-Madison labs interested in the development and/or use of neurotechnology at the trainee and scientist levels. If you're interested in attending this **FREE** event, we're providing both online and in-person registration. Please note that day of registration will not necessarily receive food as part of the day.

If you're interested in participating in the **poster session**, please send your contact information (full name, email, poster title, department, credentials) and poster abstract to witne@wisc.edu **before April 1st**. WITNe directors will select up to 4 posters to give lightning talks prior to the poster presentation.

For online registrations please email witne@wisc.edu with your Full name, title, and preferred contact email, prior to April 13th.
